# 1 Main INDAF outputs

The App 'Individual assessment feedback (INDAF)' is suitable for any assessment for which questions can be grouped into subcategories. INDAF creates individual feedback reports in pdf format, providing students with the overall grade and a generic feedback section. The user can then select from three optional sections to be included in the report. These sections all relate to the student's individual performance. For subcategories, excellent performance, as well as performance that requires attention (areas for development) are highlighted.

## Example report

Physiology of Exercise and Training			
Feedback report			
Student performance summary			
<b>B111111</b>	<b>Your mark</b>	<b>Your grade (%)</b>	
Overall (out of 80)	40	50	
<b>Subcategories</b>	<b>Subcategory mark</b>	<b>Percentage</b>	<b>Comment</b>
Physiology (out of 30)	23	77	excellent
Anatomy (out of 20)	11	55	-
Research methodology (out of 30)	9	30	area for development
Calculations (out of 40)	22	55	-
Percentage scores are colour coded. The darker the shade of green, the better the percentage score. Comment area: Subcategories with excellent scores are flagged blue, areas for development are flagged orange.			
Individual question overview			
<b>Questions</b>	<b>Maximum mark</b>	<b>Your mark</b>	
Qu. 1	10	8	
Qu. 2	10	7	
Qu. 3	10	8	
Qu. 4	10	9	
Qu. 5	10	2	
Qu. 6	10	1	
Qu. 7	10	0	
Qu. 8	10	5	
Whole exam	80	40	
Individual comment			
Very well done on aspects ABC, not so well done on aspects DEF.			

optional section 1

optional section 2

optional section 3

### Example report, continued from previous page

#### Generic feedback

On a group level, this was not a very strong exam performance (average in the low fifties). Whilst some questions were very well answered, some lacked an element of explanation, which indicates they may have been taken from various sources and have not been "truly" understood.

In this report you can check your own performance in the subcategories of this exam. I would also suggest that you focus your exam debrief on your areas for development, as they may be essential to enhancing your understanding in year 3.

##### Exam-specific feedback

- I am not sure whether many of the cohort understood that some aspects of anaerobic metabolism can ONLY be measured intracellularly, hence necessitating a muscle biopsy to get an overall understanding of anaerobic muscle metabolism (and that a blood lactate sample is an extracellular measurement).
- Perceived exertion and applications: read up on estimation and production trials. Also, "blinding" of the participant for this question is blinding to ANYTHING other than RPE - so participants should be blinded to feedback on heart rate, exercise intensity, pedal rate, etc.
- Many forgot to mention hyperplasia as a potential mechanism for strength gain that is unrelated to hypertrophy.

As an additional resource, please also refer to the generic exam feedback which will be posted on Learn.

*Please note – as is the case with all assessments, marks are provisional and subject to final approval and confirmation at the examination/review board.*

On completion of the marking, a cohort analysis (statistics overview) is available to the marker.

### Example statistics overview

## Analysis

Assessment: 21PSB713

### Basic statistics

Whole cohort

Excluding Zero mark assessments

Number of students	298		272
Maximum marks awarded	80		
	Marks scored	Grade, %	Marks scored
Average	38.2	47.7	41.8
Standard deviation	12.8	16.0	5.1
Median	41.0	51.3	42.0
Minimum	0.0	0.0	26.0
Maximum	56.0	70.0	56.0

### Distribution detail, by question (excluding Zero mark assessments)

	Whole exam	Qu. 1	Qu. 2	Qu. 3	Qu. 4	Qu. 5	Qu. 6	Qu. 7	Qu. 8
Maximum marks awarded	80	10	10	10	10	10	10	10	10
Average (marks scored)	41.8	2.7	2.5	5.2	8.6	4.7	5.1	3.5	9.5
Standard deviation (marks scored)	5.1	1.7	1.1	1.4	1.2	3.0	2.0	2.2	0.5
Average (Grade, %)	52.3	27.2	25.3	52.3	85.7	46.6	50.9	35.4	95.0
Standard deviation (Grade, %)	6.4	16.7	11.1	14.1	11.5	29.8	19.9	21.7	5.0

Total	272	272	272	272	272

## 2 Navigation through INDaf

### 2.1 Dashboard and Archive

1. Current assessments, as well as their current marking progress, are shown on the Dashboard
2. INDaf files (file name ends in '.indaf') located on the computer, or received via e-mail, can be added to the dashboard (drag and drop)
3. Current assessments no longer needed can be added to the Archive (drag and drop)
4. Clicking on assessment opens action tab for existing files. The top option allows to continue marking
5. 'New assessment' moves the user to Setup (chapter 2.2)

6. Within the Archive, click on files and 'de-archive' (Returned to dashboard) if required
7. Organise Archive by creating own folders
8. Return to Dashboard

The screenshot displays the INDAF Dashboard interface. At the top, there are two buttons: 'Dashboard' and 'Archive'. The 'Dashboard' button is circled in red and labeled with a red '8'. Below these buttons, the interface is divided into two main sections: 'Files' and 'Folders'.

The 'Files' section contains a table with the following columns: File Name, Assessment, Last saved, Students, Questions, and Marking Progress. The table is highlighted with a red box and labeled with a red '6'. The table contains five rows of data:

File Name	Assessment	Last saved	Students	Questions	Marking Progress
fj:alskj d:flakjs :dfjja:slkd fj:inc	PSC111-EX2 xxxxxxxx	07/09/2022 17:18:00	11	6	39 %
220831-160730 - askdjfalsk f	PSB111	31/08/2022 16:07:30	3	10	66 %
220905-125339 - sssssssssss	12345678901234567	05/09/2022 12:53:39	6	10	50 %
220905-221027 - 220905-125	12345678901234567	05/09/2022 22:10:27	6	10	31 %
220905-221427 - 220905-125	12345678901234567	05/09/2022 22:14:27	6	10	38 %

The 'Folders' section is highlighted with a red box and labeled with a red '7'. It contains a search bar and a 'New Folder' button. Below these, there are three folders listed: '21PSB713 - SA1', '21PSB713 - SAP', and 'test files'.

A context menu is open over the 'Files' table, showing three options: 'Return to Dashboard', 'Rename file', and 'Move to Recycle Bin'.

At the bottom of the dashboard, there is a 'Recycle Bin' section with a trash icon and the text: 'Drag and drop .indaf files here to delete them.'

The bottom right corner of the dashboard displays the text: 'INDAF Dashboard 0.6.1.0'.

## 2.2 Setup

1. Hover over input fields to reveal further information.
2. Download ID numbers from Learn (Click information icon for further detail). Alternatively, manually insert student IDs in the input box below. This can be done in bulk, e.g., copy all IDs within an Excel spreadsheet and paste into the field 'Manually add student IDs'.
3. Students can be sorted by ID. If they were imported from Learn via the .csv file. It is also possible to sort them by student name. Whilst student names are not shown (anonymity!), they are stored in the background. Sorting IDs by student name may be helpful if exam scripts are returned in that order (is often the case for exam hall assessments). This order will be retained in the marking table, allowing the marker to have the same student order within INDAF as for the scripts received.
4. Clicking the house icon returns to the dashboard.

The screenshot shows the 'Setup' window for 'INDAF:PSC111-EX2'. The interface includes a top navigation bar with 'Save', 'Save As', and a 'Setup' button (circled with a red '4'). Below the navigation bar are tabs for 'Subcategory Allocation', 'Marking Table', and 'Feedback Report'. The main setup area has four sections: 'Module/Assessment Code' (PSC111-EX2), 'Number of Questions to mark' (6), 'Number of Subcategories' (4), and 'Student IDs'. The 'Student IDs' section contains a 'Load Learn course ID .csv file' button (circled with a red '2' and an information icon) and a 'Manually add student IDs' button. A red box labeled '1' encompasses the 'Student IDs' section. To the right, the 'ID Numbers' section shows a list of IDs (B11121 to B11129) with checkboxes, a 'Sort by: ID' dropdown (circled with a red '3'), and 'Clear Selected' and 'Clear All' buttons. At the bottom, it states '11 IDs loaded'.

## 2.3 Subcategory allocation

1. Amend question titles (optional); e.g., change 'Q1' to '1a'.
2. Input maximum marks awarded per question. Right clicking into such a field allows to allocate the same Max. Mark to all questions. If an assessment has optional questions (causing the assessment Total Max. Mark to be lower than the sum of all questions), the 'Total Max. Mark' must be adjusted manually. See Chapter 6.4 for more detailed explanations.
3. Amend subcategory titles; e.g., change 'Subcategory 1' to 'Theory-based questions'.
4. Allocate questions to subcategories using the tick boxes.
5. If, during the marking process, any of the specifics in within 'Subcategory Allocation' need changing, users can return and update.

The screenshot shows the 'Subcategory Allocation' tab for assessment 'PSC111-EX2'. The interface includes a top bar with 'Save', 'Save As', and 'Undo' buttons, and a navigation bar with 'Setup', 'Subcategory Allocation' (active), 'Marking Table', and 'Feedback Report' tabs. On the right, there are 'Back' and 'Next' buttons. The main area contains a table for allocating questions to subcategories. The table has columns for Question Title, Max. Mark, and a grid of checkboxes for allocation. The 'Total Max. Mark' is displayed as 60, with an 'Adjust Max. Mark' checkbox. Red boxes and numbers 1-4 highlight specific areas: 1 points to the Question Title row, 2 points to the Max. Mark row, 3 points to the Subcategory list, and 4 points to the allocation grid.

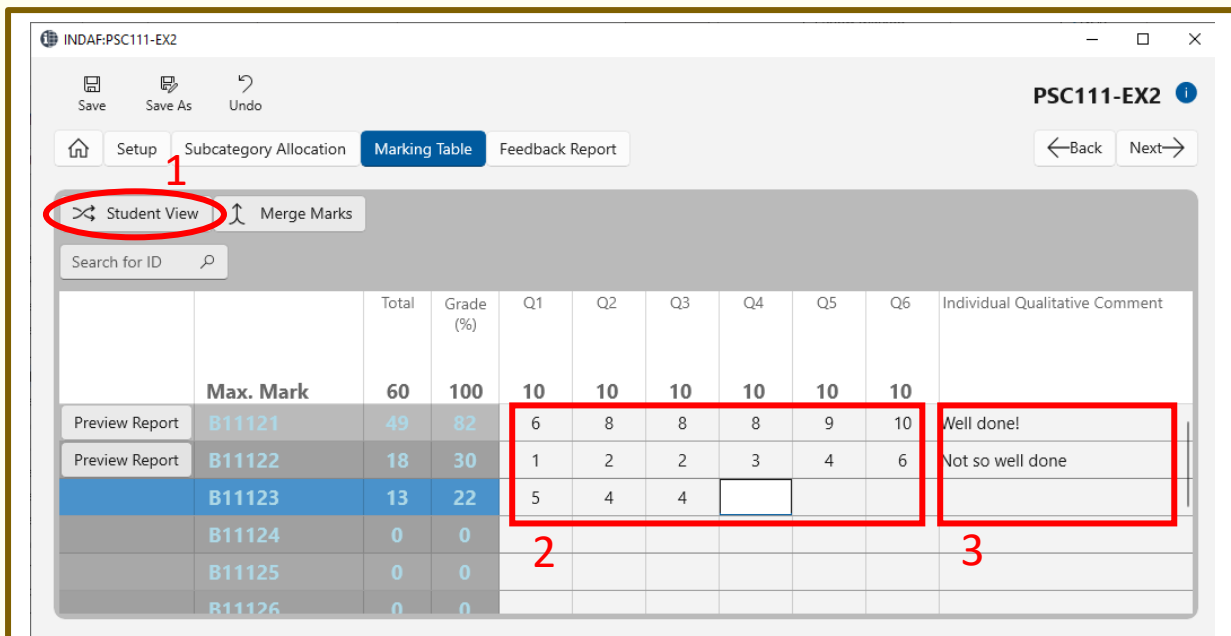

Question Title	Q1	Q2	Q3	Q4	Q5	Q6
Max. Mark	10	10	10	10	10	10
Subcategory 1	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Subcategory 2	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Subcategory 3	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Total Max. Mark: 60 ☐ Adjust Max. Mark

New Subcat... +

## 2.4 Marking table

1. Marks can be entered in either in the cohort view or the student view, swap views using the button
2. Complete marks. Navigate using Arrow keys or Tab / Ctrl + Tab keys.
3. Optional: Complete Overall comments; i.e., qualitative feedback that is individual to the student shown (most likely not appropriate for large cohorts!). Comments that are often used can be saved and re-used.

## 2.5 Feedback report

1. The report title will appear as first line on the report.
2. Grade boundaries are pre-set for an Undergraduate Assessment, but they can be changed manually.
3. If all ID numbers are selected, INDAF will only create reports for those students that have been marked ('Zero-mark reports' will not be created).
4. 'Create Learn Upload Zip' creates a Zip file that allows the direct upload of all PDF reports onto the respective student profiles on Learn. See information icon for further instructions.

The screenshot shows the INDAF Feedback Report interface. The window title is 'INDAF'. The top navigation bar includes 'Save', 'Save As', and 'Undo' buttons. The main navigation tabs are 'Home', 'Setup', 'Subcategory Allocation', 'Marking Table', and 'Feedback Report' (which is active). The right side of the header shows 'PSC111-EX2' with a help icon, and navigation buttons 'Back' and 'Next'.

The main content area is divided into several sections:

- Report Title:** A text input field containing 'Example module 1' (annotated with a red box and the number 1).
- Area for development (less than):** A text input field containing '39.5' (annotated with a red box and the number 2).
- Excellent (greater than):** A text input field containing '69.5' (annotated with a red box and the number 2).
- Checkboxes:** Three checkboxes are checked: 'Include Subcategory Overview', 'Include Question Overview', and 'Include Individual Student Feedback'.
- Folder to save Reports to:** A text field showing the path 'C:\Users\pscal\Desktop'.
- Generic Feedback:** A section with a red circle icon and the text 'Include General Feedback'.
- ID Numbers:** A panel on the right with a 'Select All' checkbox (checked), a search bar, and a list of student IDs with checkboxes: B11121, B11122, B11123 (missing data), B11124 (no data), B11125 (missing data), and B11126 (no data). This panel is annotated with a red box and the number 3.
- Buttons:** At the bottom right, there are three buttons: 'Preview Report', 'Create PDF Reports', and 'Create Learn Upload' (annotated with a red box and the number 4). The 'Create Learn Upload' button has a small information icon.

### 3 Creating subcategories – examples

#### 3.1 Example 1: Subcategories formed based on sub-questions

##### Subcategory Allocation

Question title	1a	1b	1c	1d	2a	2b	2c	3a	3b	4	TOTAL
Maximum marks per question	10	10	10	10	10	10	10	10	10	10	100

☐ marking table locked for marking

Question subcategory title										
Question 1	x	x	x	x						
Question 2					x	x	x			
Question 3								x	x	
Question 4										x

##### Associated feedback report

Student performance summary			
B1	Your mark	Your grade (%)	
Overall (out of 100)	51	51	
Subcategories	Subcategory mark	Percentage	Comment
Question 1 (out of 40)	26	65	-
Question 2 (out of 30)	6	20	area for development
Question 3 (out of 20)	10	50	-
Question 4 (out of 10)	9	90	excellent

### 3.2 Example 2: Subcategories formed based on question scores (low vs high), lab vs lecture content, nature of questions, or thematic areas

You may want to associate more than one subcategory per question. Below, question 2 belongs to Thematic area 1, but is also a high scoring question, and tests lecture related content. Creating more subcategories as such may hence provide the learner with more detail in the feedback report.

#### Subcategory Allocation

Question title	Qu. 1	Qu. 2	Qu. 3	Qu. 4	Qu. 5	Qu. 6	Qu. 7	Qu. 8	Qu. 9	Qu. 10	TOTAL
Maximum marks per question	5	10	10	4	3	10	10	8	3	10	73

## 4 Merge marks from multiple markers

First, the module leader needs to create an assessment and complete all relevant assessment information (Setup and subcategory allocation, see chapters 2.2 and 2.3), then save.

1. The file appears on the Dashboard.
2. Find this file in your file explorer: This PC > Documents > INDAF assessments > Dashboard.  
Share this INDAF file with all markers (e.g., via e-mail)
3. On completion of the marking, collate all INDAF files via e-mail and add them to the Dashboard (drag and drop files onto 'Add file' – rename if required)

The screenshot displays the INDAF Dashboard interface and a Windows File Explorer window. The dashboard shows a table of files, with the file '21PSB111-EX1.indaf' highlighted. The File Explorer window shows the file '21PSB111-EX1' selected in the 'Dashboard' folder.

**INDAF Dashboard Interface:**

- Navigation: Dashboard (selected), Archive
- Search: Search...
- Buttons: New Assessment
- Table Headers: File Name, Assessment, Last saved, Students, Questions, Marking Progress
- Table Data:

File Name	Assessment	Last saved	Students	Questions	Marking Progress
21PSB111-EX1.indaf	21PSB111-EX1	09/09/2022 14:12:02	293	10	0 %
- Footer: INDAF Dashboard 0.6.1.0
- Actions: Recycle Bin, Add File (circled with red 3), Archive file

**Windows File Explorer Interface:**

- Path: << IND... > Dashb...
- Search: Search Dashboard
- Table Headers: Name, Status, Date modified, Type, Size
- Table Data:

Name	Status	Date modified	Type	Size
Archive		09/09/2022 13:10	File folder	
21PSB111-EX1		09/09/2022 13:11	INDAF File	162 KB
- Footer: 2 items | 1 item selected 161 KB | Sync pending

9. The files from other markers appear on the Dashboard
10. Select the file you merge marks into (presumably your own, original file), then click 'Merge Marks'.
11. Select the file you wish to merge into your own file and click merge. If no files appear in this window, you don't have any files that match your assessment in the Dashboard (files must have the same assessment code, s). INDAF will not allow to merge if the number of questions do not match.
12. The files from the other markers, if no longer needed, can be archived.

## 5 Import data

### 5.1 Step 1: Set up your assessment

Follow the steps outlined in chapters 2.2 and 2.3 to set up your assessment and save it. At this point your assessment does not contain any marks.

The assessment may contain more questions than you plan to import (e.g., you may wish to import marks for 8 questions, but manually mark an additional 4 questions - in this case, define 12 questions in the exam up. The import function will then import the 8 external questions and include that data, leaving Q9 – Q12 blank for manual marking (the assessment can be manually marked before, during, or after the import).

### 5.2 Step 2: Preparing the data to import

Data must be prepared in Microsoft Excel and saved as an xls,xlsx, or csv file. It must have the following format:

1. Student ID numbers given in column 1. These must match the ID numbers of the assessment set up in Step 1.
2. Question titles given in row 1.
3. Only 1 Tab should be used (do not create multiple Tabs/Sheets).

	A	B	C	D	E	F	G	H	I	J
1		Q1	Q2	Q3	Q4	Q5	Q6	Q7	Q8	
2	B111111	8	7	5	4	3	2	1	0	
3	B111112	7	6	5	4	5	8	9	8	
4	B111113									
5	B111114	8	4	4	0	5	8	9	8	
6	B111115	4	5	6	8	7	9	4	0	
7	B111116									
8	B111117									
9	B111118									
10										

The screenshot shows an Excel spreadsheet with the following data:

	A	B	C	D	E	F	G	H	I	J
1		Q1	Q2	Q3	Q4	Q5	Q6	Q7	Q8	
2	B111111	8	7	5	4	3	2	1	0	
3	B111112	7	6	5	4	5	8	9	8	
4	B111113									
5	B111114	8	4	4	0	5	8	9	8	
6	B111115	4	5	6	8	7	9	4	0	
7	B111116									
8	B111117									
9	B111118									
10										

Red boxes and numbers 1, 2, and 3 highlight the student ID column, the question title row, and the single sheet tab respectively.

### 5.3 Step 3: Import the data

1. On the dashboard, select the saved INDAF assessment and select 'Import'. In the following prompt, select the Excel file that contains the data to import.

## 6 Questions and feedback
